Please reject Petition 04-160. As someone who has worked in radio in the past, I know firsthand that most traditional broadcasters DO NOT provide services with the public's best interest in mind. It is truly sad that when a method of doing so comes along, the traditional broadcasting clique bends over backward to try and squash it. Maybe the NAB members should spend more time providing us with entertaining and informative content as opposed to the crap they are shelling out now. It is the greatest thing in the world to be driving into a major city and before getting into the thick of the traffic congestion, have a way of knowing what the traffic situation is, and what areas to avoid. HOW IS THAT A BAD THING? Traditional broadcasters only offer traffic updates during morning and afternoon drive times. We live in an on-demand society, so what's the problem?
